

PRESS RELEASE

iBAHN expands into The Middle East

21 March, 2007 – iBAHN, a leading provider of broadband services to business travellers worldwide, today announced the opening of new operations in Dubai, UAE.

The middle-eastern base will allow iBAHN to build on its success in Europe and the US, and offer a launch-pad for additional geographic growth. Dubai is at the centre of the world's new hotel development industry, boasting the largest development pipeline of any region over the next five years.

iBAHN's entry into the market will accelerate opportunities for prospective hotel partners. This will be achieved by delivering higher guest satisfaction through its fully managed high speed internet services, and by delivering significant ROI via iBAHN's lucrative revenue share deal, which allows iBAHN's partner hotels to take a significant percentage of internet service profits.

Christian Steinkampf, iBAHN Sales Director EMEA, who has extensive knowledge of working in the Dubai hospitality market, comments: "Dubai is a strategically important region for iBAHN as it is a well-recognised hub for international business. iBAHN's experience with the demands and quality of service expected by hotels and guests is proven across the globe, and we are looking to build on this by working with partners who want the best possible experience for business travellers."

New for 2007 is iBAHN's Speed Solution that offers guests a choice of bandwidth options depending on their needs. This unique offering means that a guest can select basic access to allow them to check email and surf the net, or choose to pay extra for premium access to a truly high-speed connection for larger file transfer, video streaming and a quality connection to their corporate network.

iBAHN is an approved vendor for Hilton, Intercontinental, Marriot and Rocco Forte, and is partnered with Mandarin Oriental, Ritz Carlton and many other leading hotel brands.
