

PRESS RELEASE

iBAHN unveils 'Speed Solution' at IHIF 07

The Internet service is a European first for wireless connectivity in the hospitality industry

5 March, 2007 – iBAHN, a leading provider of broadband services to business travellers worldwide, today announced it will be unveiling its Speed Solution at the 10th annual International Hotel Investment Forum (IHIF), which will be held 5-7 March 2007 at the InterContinental Berlin, Germany.

Attendees will be introduced to Speed Solution, one of the lowest-cost, free to guest, wired or wireless broadband service models available. iBAHN is the only hospitality broadband service provider able to manage and deliver different levels of wireless bandwidth, providing hotel guests with the option of using premium high-speed internet access (HSIA), or a basic high-speed internet connection for free, which is dependent on the hotel partner's pricing policy.

In addition to sponsoring IHIF, iBAHN will be providing wireless internet connectivity to delegates and internet stations, available in the show's public areas and Internet Café.

iBAHN's MD EMEA Graeme Powell, who will be a panellist in IHIF Session 6 - Future In-Room Technology, comments: "IHIF is a crucial event for iBAHN. The forum is a focal point for the industry, attracting key players from every corner of the world. iBAHN has selected IHIF to unveil our Speed Solution, which enables hoteliers to cost-effectively manage guests' ever-increasing needs for bandwidth."

The theme for the IHIF 2007 is "Where Are We Going From Here?" which reflects the booming hotel investment climate in Europe, and the considerable interest in how the industry will develop over the coming years.
